ISBN 978 3 03835 040 8

# Table of Contents

## Preface

## Chapter 1: Energy Efficient Buildings

<b>Analysis of Energy and Internal Environment Improvements in a Single Family House</b> M. Kamensky, A. Vaskova and M. Vertal'	3
<b>Application of BIM Process by the Evaluation of Building Energy Sustainability</b> M. Jašek, J. Ceselsky, P. Vlček, M. Černíková and E. Berankova	7
<b>Comparison of Simulated and Actual Energy Use of a Hospital Building in Austria</b> N. Saipi, M. Schuss, U. Pont and A. Mahdavi	11
<b>Energy Consumption and CO<sub>2</sub> Emission of Buildings Built with Industrialized Technology: The Case of Debrecen and Future Trends</b> T. Csoknyai	16
<b>Evaluation of Energy Efficiency in Retrofitting Residential Buildings with Large-Panel Structures</b> E. Megyesi and M. Brumaru	24
<b>Exergy Quality of Buildings</b> F. Kalmár	30
<b>Indoor Environment and Energy Performance of Office Buildings Equipped with a Low Temperature Heating / High Temperature Cooling System</b> D. Petráš, M. Krajčík, J. Bugáň and E. Ďurišová	36
<b>House in Passive Standard - Thermal Bridges</b> M. Palko	42
<b>Interaction of New Physical-Energy Quantification of Buildings and Renewable Energy Sources as a Dominant Production Technology of Natural Capital</b> M. Bielek, B. Bielek and J. Híreš	46
<b>Nearly Zero-Energy Requirements and the Reference Buildings</b> A. Zöld and Z. Szalay	52
<b>The Effects of the Soils Thermal Field onto the Energy Performance of Buildings</b> P. Kacálek, T. Petricek and R. Smolka	58
<b>Thermal Bridges Minimizing through Typical Details in Low Energy Designing</b> R. Ingeli, B. Vavrovič and M. Čekon	62
<b>Thermal Bridges Minimizing through Window Jamb in Low Energy Buildings</b> R. Ingeli, B. Vavrovič, M. Čekon and L. Paulovičová	66
<b>Thermal Comfort in a Refurbished Low-Energy House: The OEKOHAUS Case Study</b> L. Skoruppa, U. Pont, M. Schuss and A. Mahdavi	70
<b>Total Solar Energy Transmittance vs. Dynamic Thermal Characteristics of Non-Transparent Building Components</b> R. Rabenseifer	77
<b>Transformation Determinants of Existing Urban Hotels while Taking into Account all Aspects of Sustainable Development</b> Z. Tóthová	83
<b>Cost Optimality and/or Sustainability in our Building's Life</b> K. Severnyak	87
<b>Optimization of Building Envelope Components Based on Life Cycle Environmental Impacts and Costs</b> P. Medgyasszay and Z. Szalay	93
<b>Building Sector &amp; Climate Change: The Case of Hungary</b> A. Talamon	99

## Chapter 2: Heat Storage and Energy Savings

<b>Alternative Way of Thermal Protection by Thermal Barrier</b> M. Doležel	107
<b>Determination of Linear Thermal Transmittance for Curved Detail</b> F. Vlach and P. Jelínek	112
<b>Determining Cumulative Room Temperature under <i>In Situ</i> Conditions Using Combined Method</b> M. Flimel	116
<b>Energy Design by Evolution: Applying Evolutionary Computing to Energy Efficient Architectural Design</b> B. Sommer and U. Pont	120
<b>Experimental Measurements and Numerical Simulations of Dynamic Thermal Performance of External Timber Frame Wall</b> I. Skotnicová, Z. Galda, P. Tymova and L. Lausova	126
<b>Hot Water Temperature Drop in a Pipe as a Parameter in Order to Define Operation Time of a Circulation Loop in Domestic Hot Water Distribution System</b> K. Knizova and M. Kováč	131
<b>Impact of Facade Colouring on Temperature and Light Conditions of Buildings, Housing Estates, and Environment</b> J. Pašek and D. Bosova	135
<b>Improvements of Energy Balance of Existing Residential Buildings</b> M. Budiaková	139
<b>Low Energy Source Synthetic Thermal Energy Storage (STES)</b> V. Šípková, J. Labudek and O. Galas	143
<b>Numerical Analysis and Measurement Results of a Window Sill</b> D. Katunský, M. Zozulák, K. Kondáš and J. Šimiček	147
<b>Optimization of Swimming Pool Hall's Envelope with Respect to Thermal and Moisture Design</b> P. Jelínek, J. Krupicová and T. Petricek	151
<b>Possibilities of Simulations in the Planning of the Retrofit of Historical Double Skin Windows</b> D. Bakonyi and G. Becker	155
<b>The Impact of the Choice of Computational Methods on the Results of Simulations of Specific Heat Consumption for Heating a Family House</b> L. Šteffek, P. Jelínek, J. Kalánek and M. Ostrý	161
<b>The Influence of Construction Fillings of Building on Airtightness</b> M. Kraus and D. Kubečková	166
<b>The Influence of the Position of Windows on <math>\Delta U</math> Value</b> R. Mend'an and M. Pavčeková	170
<b>The Natural Physical Cavity Energy Regime of Double-Skin Facade</b> B. Bielek, M. Bielek and D. Szabó	174
<b>Thermal and Moisture Problems of Wooden Windows</b> A. Palková and M. Palko	180
<b>Windows in Buildings - Diagnostics of Selected Properties after Time of Using</b> P. Oravec	184
<b>Wooden Window Structure and its Thermo-Humid Mode</b> L. Kamenický	188
<b>Thermal Properties of Wooden Buildings in Relation to Computer Software</b> L. Kucerova, M. Černíková and B. Hrubá	193
 <b>Chapter 3: Integration of Renewable Energy Sources</b>	
<b>A Software Optimization of the Solar Energy System Performance</b> L. Skalík and O. Lulkovičová	199
<b>Comparison of Modelled Distribution of Thermal Fields at Seasonal Ground Storage Segments</b> R. Partika and M. Kalousek	205

<b>Construction in the Trend of Sustainability_ Wooden Houses with Integrated Photovoltaic Systems</b>	
E. Oravcová	209
<b>Electricity Storage in Passive House in Central Europe Region</b>	
L. Chuchma and M. Kalousek	213
<b>Evaluation of Possible Use of Foliage as a Fuel for Small Combustion Equipment</b>	
L. Martiník, V. Drastichová, J. Horák, Z. Jankovská and P. Kubesa	218
<b>Photovoltaic Arrays on Flat Roofs – An Aspect of Yearly Energy Production</b>	
A. Zöld and M. Sepródi-Egeresi	222

## Chapter 4: Effective Ventilation

<b>A New Type of Heat Exchanger for Ventilation in Buildings with Nearly-Zero Energy Consumption</b>	
P. Horák, A. Pavel and I. Ambrožová	231
<b>CFD Model of an Underfloor Air Cavity Created from Special Fittings and its Verification Using a Laboratory Model</b>	
T. Renčko and A. Sedláková	235
<b>Comparison of the Impact of the Ventilation Ducts on Thermal Properties of the Exterior Walls</b>	
H. Sevcikova, E. Rykalova and R. Fabian	241
<b>Experimental Verification of Air Quality in Primary Schools</b>	
M. Javorček	245
<b>Impact of the Installed Inlet Vent Flaps in the Window Structure on the Overall Aerodynamic Properties of the Window</b>	
V. Majsniar, B. Bielek and D. Szabó	250
<b>Natural Ventilation and Forced Warm Air Ventilation in Offices</b>	
M. Budiaková	256
<b>The Effect of Air Condition on Reduction of CO<sub>2</sub> Concentration in Buildings in Family Houses</b>	
L. Michnová, M. Černíková and B. Hrubá	260

## Chapter 5: Quality of Indoor Environment

<b>Analysis of Summer Overheating in Elementary School Building</b>	
M. Kamensky, M. Lopusniak and D. Katunský	269
<b>Architecture and the Internal Environment in the Current Office Buildings - Environmental Aspects</b>	
P. Nahálka	273
<b>Case Study of Light Pollution in Urbanized Area of Slovakia</b>	
P. Fulop, P. Hanuliak and L. Mankova	277
<b>Colour of External Shading Obstacles and Circadian Stimulus of Indoor Daylighting</b>	
J. Hraška and P. Hartman	283
<b>Comparative Study of Window Glazing Systems Influence on Melatonin Secretion in Patients in the Hospital Wards</b>	
J. Hraška, P. Hanuliak, P. Hartman, M. Zeman and K. Stebelová	288
<b>Design as a Tool for Environmental Therapy in the Fight against Lifestyle Diseases</b>	
A. Hofbauerová	294
<b>Design of Balcony from the Point of View of Daylighting</b>	
L. Gábrová	298
<b>Design of School Environment in the 21st Century</b>	
D. Končeková and L. Rollová	302
<b>EN Criteria for Evaluation of Daylight in Interiors</b>	
S. Darula, R. Kittler and M. Malíková	307
<b>Evaluation of Thermal Environment and Indoor Air Quality in University Libraries in Vienna</b>	
G. Adam, U. Pont and A. Mahdavi	315

<b>Impact of the New CEN Minimum Illuminance Criterion on the Working Plane Size</b> M. Fabian and S. Darula	321
<b>Influence of Instantaneous Measured Data on Evaluation Interval of Daylighting</b> L. Janečková, S. Darula and D. Bosova	328
<b>Interior Environment of the Buildings Hit by Floods</b> J. Pašek, T. Tribulova and J. Frankl	332
<b>Shading by Surrounding Obstacles</b> M. Hlaskova	338
<b>Sunlight Penetration through Sloped Window Apertures</b> K. Kondáš, S. Darula and M. Zozulák	342
<b>Thermal Stability of the Summer Period in Schoolrooms</b> I. Svatošová and L. Michnová	346
<b>Assessment of Daylighting Design Tools Against Test Cases Included in CIE's 171:2006 Report</b> F. Vajkay and L. Žižka	352
<b>Exploring the Contact Comfort within Complex Well-Being in Microenvironment</b> V. Kotradyová and A. Teischinger	356

## Chapter 6: Natural and Environmental Friendly Building Materials

<b>Air-Tightness and Acoustic Properties of SuperAdobe System</b> J. Teslík, N. Zdražilová and M. Vodičková	365
<b>Building Physical, Energetical and Hygrothermal Analysis of Earth-Sheltered Building Constructions</b> A. Dudás and L. Farkas	369
<b>Calculation and Experimental Evaluation of the Thermal Resistance of a Structure with Reflective Insulation</b> J. Kalánek, L. Šteffek and M. Ostrý	374
<b>Comparison of the Thermal Properties of Different Insulating Materials</b> A. Lakatos	381
<b>Controlling and Testing of the Uneven Wall Surface</b> M. Nič and J. Nováčiková	387
<b>Correlation Relationships between Properties of Brick Body and their Use in Building Practice</b> M. Šveda and R. Sokolař	393
<b>Impact of Concrete Recycled Materials on some Properties of Concrete</b> M. Ledererova	399
<b>Improving the Thermal Insulation Properties of Brick Products Using Chemical Additive Vuppor</b> M. Šveda	403
<b>Influence of Fluidized Fly Ash on the Selected Physical-Mechanical Properties of the Autoclaved Aerated Concrete</b> A. Struhárová, S. Unčík, S. Balkovic and M. Hlavinková	409
<b>Microclimatic Effects of Green Facades in Urban Environment</b> F. Szkordilisz	415
<b>Microorganism on the Fasades of Residential Panel Housing</b> D. Kubečkova	421
<b>Possibilities of Thermal Analysis for the Evaluation of Construction Materials</b> P. Mec, T. Murínová and K. Kubečka	425
<b>Risk Analysis of Asbestos Structures and their Impact on the Internal Environment of Buildings</b> P. Vlček, K. Kubečka, H. Vaculikova, D. Kubečkova and V. Sojkova	431
<b>Study of the Properties of the Environmentally Friendly Insulation Materials</b> J. Zach and J. Hroudová	435
<b>The Assessment of the Refurbished Reinforced Concrete Buildings in Point of the Climate Change</b> S. Hrabovszky-Horváth	440

<b>The Transition of the Water Steam through the Composition of the Diffusive Closed Circumferential Wall of the Wooden House with the Proper and Improper Realization of Vapor Barrier</b>	
M. Uvizlová and T. Bečkovská	446
<b>Thermal Properties of Selected Lightweight Wooden Walls and Windows in the Regime of Long Time Testing</b>	
P. Durica, M. Ďurínková, R. Ponechal, D. Štaffenová and M. Štůňová	450
<b>Timber as Renewable Building Material and its Use in Modern Architecture</b>	
P. Korček	457
<b>Timber - Traditional Material History or Vision in Architectural Design</b>	
T. Varga and P. Pauliny	460
<b>Transient Pulse Method for Measuring of Heat Conductivity of Autoclaved Aerated Concrete</b>	
M. Vertal, D. Katunský and J. Šimiček	466
<b>Ultra Thin Glass Membranes for Advanced Glazing of nZEB</b>	
I. Chmúrny	470
<b>Use of Multi-Criteria Optimization for Selection of Building Materials for Reconstruction</b>	
M. Halířová and E. Rykalova	474
<b>Application of Phase Change Materials to Reduce the Risk of Overheating of Building Interior</b>	
T. Klubal, M. Ostrý and R. Brzoň	479

## Chapter 7: Acoustic Design and Noise Protection

<b>Door Bottom Joint Design and its Influence on Sound Transmission of the Door</b>	
D. Dlhý and K. Minarovičová	487
<b>Effect of Acoustic Pads' Different Dynamic Stiffness on the Reduction of Impact Sound Level</b>	
L. Autratová and P. Hlavsa	491
<b>Influence of Double Transparent Facades on Acoustic Comfort at the Workplace</b>	
D. Urbán, D. Dlhý, P. Tomašovič and P. Zaťko	495
<b>Mockup Investigation of Lightweight Timber Floor</b>	
J. Medved, B. Ingeleare and L. de Geetere	499
<b>Simulation of Different Acoustic Lecture Room Designs</b>	
K. Komínková, M. Papranec and L. Šteffek	505
<b>Sound Insulation Properties of the Facade Elements - The Influence of Filling Cavities of Facade Elements on the Values of Laboratory Airborne Sound Insulation</b>	
Z. Kolářová and L. Kalousek	509
<b>The Dispersion of Acoustic Energy in the Dissemination from the Source</b>	
D. Dlhý and A. Pernišová	513
<b>The Assessment of Sports Halls – The Analysis of Reverberation Time, Strength and Clarity</b>	
M. Jedovnický and P. Tomašovič	517

## Chapter 8: Fire Protection, Risk Analysis

<b>A Case Study of the Fire-Resistance of Traditional Brick Vaults</b>	
M. Fehér and G. Dobszay	525
<b>Application of Risk Analysis by the Evaluation of Buildings Indoor Environment</b>	
H. Vaculíková, P. Vlček, K. Kubečka, J. Ceselsky and M. Nič	531
<b>Assessment and Damage for Building Structures Risk Analysis Methods</b>	
K. Kubečka, P. Vlček and D. Kubečkova	535
<b>Effects of Smoke on Evacuation</b>	
M. Lopušniak	539
<b>Fire Protection Aspects of Low-Energy Buildings</b>	
L.G. Takács	543
<b>Fire Risk in Relation to BIM</b>	
J. Fridrich and K. Kubečka	552

<b>Instruments for Risk Analysis as an Alternative Decision-Making Method in the Forensic Sciences</b> K. Kubečka, S. Dobiášová, J. Fridrich, P. Vlček and M. Nič	556
<b>Internal Surface Temperatures Short-Term Measurement in the Selected Living Room with Fireplace</b> R. Ponechal	560
<b>Risk Analysis of Steel Construction Projects Documentation Blast Furnaces</b> S. Dobiášová and K. Kubečka	564
<b>Utilization of Risk Analysis Methods in Decision-Making Process on Fitness of Rehabilitation</b> K. Kubečka, P. Vlček, D. Kubečkova and D. Pieszka	568

## Chapter 9: Information Technologies in Building

<b>BRESET - Remote Sensing Technology for Building Physics Research of Structures</b> D. Bečkovský and F. Vajkay	575
<b>BIM - The Process of Modern Civil Engineering</b> J. Fridrich and K. Kubečka	579
<b>Possibilities and Problems in Applying Decision Support Systems for Special Challenges in the Design of Building Constructions</b> G. Kapovits and G. Dobszay	583
<b>SEMERGY: Performance-Guided Building Design and Refurbishment within a Semantically Augmented Optimization Environment</b> D. Włosiuk, N. Ghaissi, U. Pont, F. Shayeganfar, A. Mahdavi, S. Fenz, J. Heurix, A. Anjomshoaa and A.M. Tjoa	589

## Chapter 10: Sustainable Development and Project Management in Building

<b>An Expert System for the Cost-Optimal Refurbishment of Buildings</b> A. Csik	599
<b>Multi-Purpose Utilisation of Historic Building Glass Atrium — Case Study of the Slovak Philharmonic</b> B. Polomová, A. Vargová, V. Chmelík and D. Urbán	605
<b>The Concept of Minimalism in Sustainable Residential Buildings</b> E. Selcová	611
<b>The Idea of Modularity and Small Prefabrication of Low-Cost Housing Concepts</b> D. Mikušková	615
<b>Utilization of the Construction Waste</b> K. Prokopčáková and L. Prokopčák	619
