

Diffusion in Materials

Collection of selected, peer reviewed papers from the International Conference on Diffusion in Materials (DIMAT 2014), August 17-22, 2014, Münster, Germany. The 34 papers are grouped as follows: Chapter 1: Reactions and Interdiffusion in Binary and Multicom

Bearbeitet von
S.V. Divinski

1. Auflage 2015. Buch. ca. 250 S. Hardcover
ISBN 978 3 03835 427 7

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beack-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Table of Contents

Preface, Advisory Board, Organizing Committee and Sponsors

An Atomistic View of Grain Boundary Diffusion

Y. Mishin 1

Atomic Transport in Nano-Crystalline Silicides Studied by *In Situ* Auger Electron Spectroscopy: Interfacial Reaction Effect

A. Portavoce, K. Houmada, F. Dahlem, C. Girardeaux and B. Lalmi 12

Investigation of Grain-Boundary Diffusion of Co in Mo by Radiotracer Method and Mossbauer Spectroscopy

V.V. Popov, A.V. Sergeev and A.Y. Istomina 21

Chapter 1: Reactions and Interdiffusion in Binary and Multicomponent Systems

Interdiffusion: Consistency of Darken's and Onsager's Methods

J. Dąbrowa, W. Kucza, K. Tkacz-Śmiech, B. Bożek and M. Danielewski 29

About the Formation of the Supersaturated Solid Solutions by Diffusion Process

A. Rodin, D. Prokoshkina, A. Itckovitch and N. Dolgoplov 35

Calculation of Kirkendall Plane Position in Single and Multiphase Systems

B. Wierzba and W. Skibiński 40

Chapter 2: Ion Transport

Lithium Transport through Thin Silicon Layers: On the Origin of Bragg Peaks in Neutron Reflectometry Experiments

E. Hüger, L. Dörrer, J. Stahn, T. Geue and H. Schmidt 49

Mn Diffusion and Reactive Diffusion in Ge: Spintronic Applications

A. Portavoce, O. Abbes, S. Bertaina, Y. Rudzevich, L. Chow, V. Le Thanh, C. Girardeaux and L. Michez 56

Lithium Diffusion in Li-Rich and Li-Poor Amorphous Lithium Niobate

J. Rahn, B. Ruprecht, P. Heitjans and H. Schmidt 62

Electrochemistry of Symmetrical Ion Channel: Three-Dimensional Nernst-Planck-Poisson Model

B. Bożek, H. Leszczyński, K. Tkacz-Śmiech and M. Danielewski 68

Radiotracer Experiments and Monte Carlo Simulations of Sodium Diffusion in Alkali Feldspar: Evidence against the Vacancy Mechanism

F. Wilangowski, R. Abart, S.V. Divinski and N.A. Stolwijk 79

Cobalt Doping as the Controlling Factor of Oxygen Diffusivity in ZnO by More than Four Orders of Magnitude

M. Hashiguchi, I. Sakaguchi, R. Miyazaki, K. Takada and N. Ohashi 85

Kinetics of Void Growth in Cubic Metals: Theory and Simulation

A. Mikheev, A. Nazarov, I. Ershova and A. Zaluzhnyi 91

Chapter 3: Defects, Stresses and Relaxation

Theoretical Evaluation of Anisotropic Distortion Associated with Point Defects in Ordered Compounds

M. Souissi, R. Nakamura and H. Numakura 101

Effect of Purity on Dislocation-Induced Relaxations in Molybdenum Single Crystals

S. Suzuki and A. Seeger 106

General Approach to Diffusion under a Stress in Metals and Interstitial Alloys

A. Nazarov and A. Mikheev 112

Numerical Modelling of Heterodiffusion from the Variable Type Source

A.V. Pokoev and V.V. Volkov 120

Chapter 4: Short-Circuit Diffusion

Diffusion Controlled Grain Boundary and Triple Junction Wetting in Polycrystalline Solid Metal

I. Apyhtina, K. Kovaleva, A. Novikov, D. Orelkina, A. Petelin and E. Yakushko 127

Ni Grain Boundary Diffusion in Cu-Co Alloys

A. Rodin and A. Khairullin 130

Ga Penetration along the Grain Boundaries of Aluminum Alloys

K. Kovaleva, A. Karpushkina, G. Litvinenko, T. Popova and A. Rodin 133

Ti and Ni Grain Boundary Diffusion in B2 NiTi Compound

D.D. Liu, J. Fiebig, M. Peterlechner, S. Trubel, M. Wegner, Y. Du, Z.P. Jin, G. Wilde and S. Divinsky 137

The Model of the Layer Boundary Diffusion in Multilayer Materials

A. Petelin, A. Plokhikh, A. Novikov and E. Novikova 142

Chapter 5: Diffusion Phenomena under Strong Gravitation

MD Simulation of Ionic Crystal under Strong Gravitational Field

T. Kinoshita, T. Kawakami, K. Kawamura and T. Mashimo 151

Crystallization and Reconstructive Layer Transformation of a-Si/Au Multilayer Thin Films under a Strong Gravitational Field

Y. Okamoto, M. Aono, H. Miyazaki, Y. Ogata, M. Tokuda and T. Mashimo 156

Formation of Vanadium Oxide (V-O System) Graded Compounds under Strong Gravitational Field

J.I. Khandaker, M. Tokuda, Y. Ogata, T. Nishiyama and T. Mashimo 164

Chapter 6: Diffusion-Related Phenomena

Dislocation Mass-Transfer and Electrical Phenomena in Metals under Pulsed Laser Influence

A. Filatov, A. Pogorelov, D. Kropachev and O. Dmitrichenko 173

Modeling the Nitrogen Diffusion Enhancement Resulting from a NanoPeening® Treatment on a Pure Iron – Influence of the Grain Morphology

V. Lacaille, G. Kermouche, D.Y. Tumbajoy-Spinel, E. Feulvarch, C. Morel and J.M. Bergheau 178

Magneto-Plastic Effect in Cu-Be Alloys with Ni Additives

J.V. Osinskaya and A.V. Pokoev 186

Magneto-Diffusional Effect in Ferromagnets in the Constant and Pulsed Magnetic Fields

A.V. Pokoev and A.A. Fedotov 190

Depletion of Manganese in the Surface Layers of Fe-Mn-Si Shape Memory Alloys by Annealing

Y. Onuki, S. Fujieda, K. Shinoda, H. Ohtani, T. Maruyama and S. Suzuki 196

Effects of Compression Tests on Point Defects in Pure Ni and Ni-16wt%Cr Model Alloys

P. Ganster, A. Borbely, V. Barnier, P. Desgardin, M.F. Barthe, F. Soisson, M. Nastar, L. Martinelli and C. Desgranges 202

Atomistic Model for Ge Condensation under SiGe Oxidation

P. Ganster, A. Saul and G. Treglia 210

Chapter 7: Advanced Methods of Diffusion Measurement

A SIMS Study on Self-Diffusion in Thin Nano-Crystalline Platinum Films

W. Gruber, F. Strauß and H. Schmidt 219

Neutron Reflectometry for the Investigation of Self-Diffusion in Amorphous Silicon

F. Strauß, T. Geue, J. Stahn and H. Schmidt 225
