Preface

REACH has proved to be one of the most ambitious pieces of environmental regulation ever implemented in the EU. Given its scale and the level of opposition at the time the legislation was being negotiated, the fact that we are now able to look back on how the regime has worked in practice and assess its impact on Europe's chemical industry is, in itself, an achievement to those politicians and NGOs who pushed hard to better regulate substances in Europe.

It is still early days to really assess the impact of REACH. Indications so far suggest that it has not led to a significant downturn in Europe's chemical industry nor a major shift of production to countries with more lax environmental controls. However, more time is needed before we can really determine the REACH legacy.

It is important to put REACH in a context. The regime is, in our minds, something of a poster child for the greater regulation of chemicals and other substances being used and made in Europe. It reflects a growing concern that the impacts of the plethora of chemicals which touch our everyday lives needs to be better understood. Consumers are showing signs (albeit tentative) that they want to understand more about the substances in the products they buy and use. This awareness and the drive for greater transparency will only increase and the chemical and retail sectors will need to find ways to address this. When seen in this context, REACH is likely to be, in many senses, a platform for the further regulation and control of substances. We are already hearing calls for nanomaterials and other emerging substances to be included within the ambit of REACH. There is no doubt that the leap taken by the adoption of the REACH Regulation will make it far easier to regulate new substances and technologies in the decades ahead. Opinion is divided as to whether this is a good thing or not.

REACH is also a classic example of 'environmental imperialism' on the part of the European Commission. The regime is a regulatory framework for chemicals management designed to protect human health and the environment and this includes the phase-out of substances perceived to be problematic. The legislation affects the whole value chain. Its impact is, therefore, global. If you want to export your products to the European market, you will need to comply with the requirements of REACH even though the environmental standards in the country of manufacture may be lower. Importantly (and partly as a result of this), REACH has inspired a number of non-EU countries (such as Korea and Turkey) to consider implementing similar REACH-style chemical control legislation. Likewise, at the time of writing, the US is considering an overhaul of its TSCA chemicals regime which has been partly stimulated by REACH. This European law will, therefore, lead to similar controls being adopted around the world and legislators will look to REACH as something of a benchmark.

REACH has been in place now for just under 6 years and a lot of experience has been gained by industry and regulators. ECHA's website now plays host to detailed information on more than 100,000 chemical substances coming from over 25,000

Preface

registration dossiers and over 3 million classification and labelling notifications. ECHA has also produced a significant amount of guidance designed to supplement the Regulation itself.

Whilst regulators claim that the implementation of REACH is a success particularly regarding the exchange of information along the supply chain and safer chemicals management, some deficits still have to be addressed. In particular, ECHA has expressed concern that the quality of REACH registration dossiers submitted by industry needs improvement. There is also concern that REACH is not being effectively and consistently enforced across Europe even though Member States have shown a much greater degree of co-ordination than is the case with other environmental regimes. Criminal sanctions for non-compliance with REACH also vary, in some cases significantly, between countries. This has led to calls for enforcement to be tightened and that, rather than reprimanding industry for poor quality registration dossiers, perceived free-riders to be identified and penalized in order not to downgrade REACH to a ‘toothless tiger’. As with all such regimes, a number of high profile and significant enforcement cases will inevitably have an effect on compliance behavior.

One of the most significant elements of the REACH regime is the process created to identify substances of high environmental concern which are to be phased out of the European market. A relatively simple mechanism has been established to propose substances for phase-out (through the so-called candidate list) and, following a public consultation process, potentially subject them to a requirement to hold an authorization if they are still to be manufactured in the EU. The authorization will ensure the substance is subject to stringent controls and eventual phase out. At the end of 2012, there were 138 substances on the candidate list but only 14 substances subject to authorization (with a further 22 expected to be added in the first half of 2013). This is a relatively low number but the pace of substances being subjected to this process is increasing and there is strong pressure from NGOs (using the so-called SIN list) and some Member States to have a far greater number of substances included. This is a potentially powerful weapon for ECHA (and environmental activists) and its impact may, in the long term, be far greater than the registration process established under REACH.

This book is published just after the second registration deadline of 31st May 2013 (for phase-in substances) in order to assemble the experience gained so far on the regime. The format of the publication is designed to systematically address the most important issues arising from REACH. It is intended as a manual and collection of instructions and interpretations to provide a ready reference and information source about the key subjects of REACH. The lessons learned and experience from the current REACH implementation phases and the first registrations have been integrated into the book by some of the most recognized REACH readers. It is meant for an international audience and is aimed at a wide range of experts concerned with regulatory affairs in the European Union. We very much hope you find it a valuable reference guide as you navigate your way through the REACH jungle.

Preface

We had hoped, at the time of writing, to be able to comment in detail on the outcome of the review of REACH recently instigated by the European Commission (and as required by the Regulation itself). However, this has been delayed although the Commission has recently published a draft report on the conclusions of the review which confirms, amongst other things, that the main provisions of REACH should not change.

Preface	V
Content Overview	IX
List of Contributors	XI
List of Abbreviations and Acronyms	XIII
Chapter 1. REACH AND POLITICS – A REVIEW OF EARLY EXPERIENCE WITH THE IMPLEMENTATION OF THE EU'S REGULATORY REGIME ON CHEMICALS	1
I. Introduction	1
II. Evaluation (REACH Title VI)	3
1. Process description	3
2. Analysis	4
III. Authorisation: Candidate Listing and Prioritisation (REACH Title VII, Chapter 1, Art. 55 to 59)	4
1. Candidate listing	5
a) Process description	5
b) Analysis	6
2. Prioritisation	7
a) Process description	7
b) Analysis	8
IV. Restriction (REACH Title VIII)	9
1. Process description	9
2. Analysis	10
V. Conclusion	10
Chapter 2. SCOPE OF REACH	13
I. General Scope	15
1. General concept	15
2. Substances	16
3. Mixtures	17
4. Articles	17
a) The function of an object	18
b) The shape, surface and design of an object	18
c) Differentiation problems	18
5. Manufacturing	20
6. Placing on the market	20
7. REACH and nanomaterials	21
a) Definition	21
b) Potential	21
c) Risks	22
d) Nanomaterials as separate substances or appearance of bulk substances ..	22
e) Further research and implementation	22
II. General Exemptions from REACH	23
1. Radioactive substances	23
2. Substances under customs supervision	23
3. Non-isolated intermediates	24
4. Transported substances	24

Table of Contents

5. Waste	25
a) Waste versus product	25
b) By-products	25
c) End-of-waste	26
d) Emissions and waste waters	26
e) Chemical Safety Assessment	27
6. Exemptions in the interest of defence	27
III. Exemptions from Parts of REACH	28
1. Objectives	28
2. Exemptions from the information requirement	28
a) Collective requirement of finished state and intention for final user	28
b) Medicinal products	28
c) Cosmetic products	29
d) Medical devices	30
e) Food and feedingstuffs	30
3. Exemptions from the registration requirement and other requirements	31
a) Overview of the requirements affected	31
b) Substances used in medicinal products	31
c) Substances used in food and feedingstuffs	32
d) Substances for which sufficient information is available (Annex IV)	32
e) Substances not impacting the aims of REACH (Annex V)	32
f) Re-imported items	36
g) Recovered items	37
h) Certain isolated intermediates	39
i) Polymers	40
j) Substances used for SR&D and PPORD	42
4. Substances regarded as registered	44
a) Overview	44
b) Active substances for use in biocides	44
c) Active substances for use in plant protection products	45
d) Notified substances according to Directive 67/548/EEC	45
IV. Relationship to Other Legislation	46
1. Workplace and environmental legislation	46
a) Workplace legislation	46
b) RoHS Directive	47
c) WEEE Directive	49
2. Cosmetic products legislation	49
3. Toys legislation	51
Chapter 3. REGISTRATION OF SUBSTANCES	53
I. Introduction	54
1. Who has to register?	55
2. What has to be registered?	55
a) Phase-in-substances	56
b) Non-phase-in-substances	56
c) Recovered waste	56
3. REACH implementation timeline	57
II. Preparation for Dossier Generation	58
1. Inquiry procedure	58
2. 12-years rule	61
3. Data gathering	62
4. Data access	64
5. Letter of access	64
6. Quality of data	65
III. Registration Dossier	66
1. The core of REACH	66
2. IUCLID 5	69
a) Purpose	69

Table of Contents

b) Structure and features of IUCLID 5	71
3. Confidentiality claims	80
4. Technical Completeness Check (TCC)	82
a) Business Rules (BR)	82
b) Technical Completeness Check (TCC)	82
c) Substance Identity Check (SID)	83
IV. Chemical Safety Assessment	84
1. Introduction to risk analysis	84
2. Hazard assessment	85
3. Exposure assessment	86
a) ECETOC-TRA®	88
b) EasyTRA®	88
c) EUSES®	88
d) COSHHessentials®	88
e) Stoffenmanager®	89
f) Generic Exposure Scenario (GES)	89
g) ConsExpo®	89
h) BAMA®	89
i) ART (Advanced REACH Tool)	90
j) GREAT-ER®	90
k) CHESAR	90
4. Risk assessment	91
5. Chemical Safety Report (CSR)	91
V. Registration Dossier Submission	92
VI. Fees and Payment	94
1. ECHA fees	94
2. Payment procedure	94
3. Registration number	95
VII. Registration Dossier Update	96
VIII. Annexes	98
Annex 1. Example ECHA Communication on Inquiry Dossier	98
Annex 2. Example of Letter of Access for Data Sharing	105
Annex 3. Example of ECHA Invoice	106
 Chapter 4. STATUS OF NON-COMMUNITY MANUFACTURERS AND THE ONLY REPRESENTATIVE	107
I. Introduction	108
II. Non-Community Manufacturers under REACH	109
1. Advantage and disadvantages of appointing an Only Representative	110
2. Guidance for appointing an Only Representative	111
III. Non-EU Distributors and Non-EU Traders under REACH	112
IV. EU-Importer	113
V. The Only Representative	115
1. Roles and responsibilities of an Only Representative	116
a) Tracking of substances, importers and re-import	119
b) Safety Data Sheet responsibility	122
c) Responsibilities under CLP Regulation	123
d) Submission of an authorisation dossier	125
e) SME verification procedure	127
2. Is the OR an importer?	128
3. Qualifications of the Only Representative	129
4. Change of an Only Representative	130
5. ORO – The Only Representative Organisation AISBL	131
VI. Other EU-Representatives – is the OR Concept New?	135
VII. Annexes	143
Annex 1. Example on Communication from NCM to Importers on OR-Appointment	143
Annex 2. Example of OR-Appointment by NCM	144
Annex 3. REACH Article 8	145

Table of Contents

Annex 4. Example of Only Representative Coverage Statement	146
Annex 5. Example of Only Representative Import Certificate	147
Annex 6. ORO Position Paper on Safety Data Sheet Responsibility	148
Annex 7. Example SME-Declaration by NCM	151
Annex 8. Example Document OR Change – Appointment from NCM	152
Annex 9. Example Document OR Change – OR Transfer Declaration	153
Chapter 5. JOINT SUBMISSION	155
I. General Introduction	155
1. Commission's proposal for REACH	156
2. OSOR – one substance: one registration	156
3. Joint registration, REACH Articles 11 and 19	158
II. Individual and Joint Registration Dossiers	158
1. Information in the individual registration dossier	159
2. Information in the joint registration dossier – mandatory part	160
3. Information in the joint registration dossier – optional part	161
a) Chemical Safety Report (CSR)	161
b) Guidance on safe use	164
III. Lead Registrant and Co-registrants	164
1. Lead Registrant	165
a) Who can be Lead Registrant?	165
b) Lead Registrant responsibilities	166
3. Co-registrant	167
4. Selected examples of potential issues related to joint submission	168
a) 'Agreement of other assenting registrants'	168
b) One registrant in a joint submission?	168
c) Exceptional scenarios	168
IV. Opting out	169
1. Disproportionate Costs	170
2. Protection of Confidential Business Information	170
3. Disagreement with the Lead Registrant on the selection of information	171
4. Consequences of opting out	171
V. Final Notes	172
Chapter 6. DATA SHARING IN THE SIEF	173
I. Introduction	174
II. From Pre-SIEF to SIEF	175
1. Introduction	175
2. Members of the pre-SIEF/SIEF	175
3. Sameness discussions	176
4. Confidential business information	177
5. Formation of the SIEF	178
III. SFF – SIEF Formation Facilitator	179
IV. Data-Sharing Procedures	180
1. Data sharing in the case of phase-in substances which have been pre-registered	180
a) Gathering information	181
b) Agreement on data and cost sharing	181
c) Information gathering	182
d) Evaluation of data	183
e) Consideration of information requirements	183
f) Identification and filling of data gaps	183
g) Generation of new information	183
h) Data and cost sharing	184
i) Joint submission	186
2. Resolving data-sharing Disputes in the case of phase-in substances	186

Table of Contents

3. Data sharing in the case of non phase-in substances or phase-in substances that have not yet been (late) pre-registered	188
4. Resolving data-sharing disputes in the case of non phase-in substances or phase-in substances that have not yet been (late) pre-registered	190
V. Avoiding Unnecessary Testing	190
1. Where testing does not appear to be scientifically necessary	191
2. Where testing is not technically possible	192
3. Where substance-tailored exposure driven testing can be applied	192
VI. Current SIEF Issues	192
1. Competition law and data sharing	192
2. Only representatives/third party representatives and data sharing	194
3. Is REACH a trade barrier?	195
4. REACH review	195
 Chapter 7. FORMATION AND OPERATION OF CONSORTIA	197
I. Introduction	198
II. From SIEF to Consortia	199
1. Cooperation in small SIEFs	200
a) Forum with no binding rules	200
b) Bilateral and multilateral agreements regarding specific aspects	201
2. Cooperation in SIEFs with a high number of participants	202
a) Corporate entity	202
b) European Economic Interest Grouping (EEIG)	203
c) Association	203
d) Consortium	204
3. Differences between consortia and SIEF	205
4. Utilising consortia for REACH obligations	205
III. Consortia Framework	206
1. Introduction: Consortia agreements	206
2. Structure, scope and purpose	207
3. Membership and organisational structure	208
a) Membership	209
b) Organisational structure	210
c) Assembly	211
d) Dual managerial structure	211
e) Other bodies	212
4. Individual obligations	215
5. Data sharing	215
a) Existing data	215
b) New data	215
c) Letter of access	216
d) Licence to use	216
6. Cost sharing	217
a) Requirements for cost sharing under REACH	217
b) Bodies responsible for cost-sharing decisions	218
c) Cost allocation formulae	218
d) Late-joiner's fee	220
7. Confidentiality	221
8. Limitation of liability	222
9. Duration	223
10. Competition compliance	223
11. Dispute resolution and applicable law	223
IV. Operational Issues for Consortia	224
1. Competition law and consortia	224
a) Article 101 TFEU	224
b) Article 102 TFEU	225
c) Direct competitors; sharing data and membership	225
d) Disadvantaging competitors	226

Table of Contents

e) Closed membership	227
f) Internal and external discrimination	229
g) Collusion	229
h) Competition compliance clauses in consortia agreements	230
2. Communication with SIEFs	231
3. Disputes between existing or potential consortia members	231
a) Disclosing identity: TPRs and ORs	231
b) Expulsion of members for breaches	233
c) Advantage compensation	234
d) Excessive fees for LOA	235
4. Tax issues	235
5. Amending consortia agreements	236
6. Expanding the scope of consortia	237
V. Annexes	238
Annex 1. Template Table of Contents for Consortia Agreements	238
Annex 2. Letter of Access for Referral	239
Annex 3. Compliance with EU Competition Law	240
Annex 4. Deed	241
 Chapter 8. SUBSTANCES IN ARTICLES	243
I. Overview	244
II. Basic Concepts	246
1. Articles	246
2. Distinction of articles and substances/mixtures	246
a) Aluminium foil	247
b) Other examples	248
3. FLOWCHART: Classification of an object as an article	249
4. Intended release	250
5. Substances of very high concern	252
a) SVHCs	252
b) Candidate List	253
III. FLOWCHART: Obligations relating to substances in articles	256
IV. Registration Obligations	256
1. General registration obligation	257
a) Calculating the relevant amount	257
b) Intended release	258
c) Substances already registered	258
d) Phase-in substances	259
e) Result	259
2. Optional registration obligation following an ECHA decision	259
V. Notification Obligation	259
1. Determination of the concentration of SVHC	260
a) ECHA's view	260
b) Dissenting opinion of several Member States	260
c) The European Commission's view	261
d) How to handle components in practice?	262
e) Conclusion	264
f) Calculation for more than one article	264
2. Determination of the total amount of SVHC	264
3. Exclusion of exposure	265
4. Substances already registered	265
5. Information to be notified	266
6. Deadlines	266
7. Data on Candidate List substances in articles	266
VI. Information Obligations	267
1. Information obligations of the supplier of an article	267
2. Information obligation of the supplier to consumers	267
3. Information to be supplied	267

Table of Contents

4. Aim of the information requirements	268
5. Requirements and exemptions	268
6. Concentration calculation	268
7. Packaging material	269
8. Relevance of Candidate List inclusion date	269
VII. Restriction and Authorisation	269
1. Restrictions	269
a) Under REACH	269
b) Under other legislation	270
2. Authorisation	270
VIII. Liability	271
1. Liability for non-registration	271
2. Liability for non-notification	272
3. Liability for non-compliance with information obligations	272
Annex 1. CANDIDATE LIST	274
Annex 2. ANNEX XIV DRAFT RECOMMENDATIONS	292
Annex 3. ANNEX XIV RECOMMENDATIONS	292
Annex 4. Authorisation List	293
 Chapter 9. INFORMATION REQUIREMENTS IN THE SUPPLY CHAIN	297
A) Overview	300
B) Flow of Information Downstream	301
I. Safety Data Sheets	302
1. Obligation to draft an SDS	302
a) Mandatory SDS	302
b) Requested SDS	303
2. Content and structure of an SDS	304
a) Sections of an SDS	305
b) FLOWCHART: Compilation of an SDS	325
c) CHECKLIST: Compilation of an SDS	326
Practical Example for an SDS: see Annex 1 to this chapter	326
II. Chemical Safety Report	326
1. Purpose	326
2. Scope	327
3. CSA	327
4. Content of CSR	328
5. CSR and SDS	328
6. FLOWCHART: CSA and CSR	329
III. Information Requirements if an SDS is not Required	330
1. Scope of information	330
a) Information on registration	330
b) Information on authorisation	330
c) Information on restriction	331
d) Information necessary to identify and apply risk management measures ..	331
2. Timing	332
3. Updates	332
a) New information	332
b) Authorisation granted or refused	333
c) Restriction imposed	333
d) Update to former recipients	333
IV. Information on Substances in Articles	333
1. Scope	333
2. Structure of the provision	334
3. Information obligation	334
a) Obligation of suppliers	334
b) Information to be provided	334

Table of Contents

c) Relevant point of time	337
d) Information upon request	337
V. Relationship with CLP	338
C) Flow of Information Upstream	339
I. Upstream Information Duties of all Actors in the Supply Chain	339
1. Scope	339
2. Additional obligations of formulators	339
3. Duties of actors in the supply chain	340
a) New information	340
b) Further information	340
4. Duties of distributors	341
II. Upstream Information Duties of the DSU (Art. 37 REACH)	341
III. FLOWCHART: Information Flow and Obligations for Dangerous Substances	341
IV. Model Letter on Hazards not Included in the SDS	341
V. CHECKLIST: Overview on Information Rights and Obligations in the Supply Chain	342
D) Access of Employees to Information	343
I. Workers and their Representatives	343
II. Information to be Provided	343
III. Obligation of the Employer	343
IV. Granting of Access	344
V. Use and Potential Exposition	344
VI. Refusal to Grant Access	345
F) Obligation to Keep Information	345
I. Suppliers of a Substance or Mixture	345
II. Information	345
III. Obligations	346
IV. Cessation of Activity and Transfer of Operations	346
Annex	348
Annex 1. Safety Data Sheet (SDS)	348
Chapter 10. DOWNSTREAM USERS	363
I. Definition of Downstream Users	363
II. Roles and Responsibilities of Downstream Users	364
1. Roles of downstream users	364
2. Responsibilities of downstream users	366
a) Registrations and downstream users – Articles 37 to 39 REACH	366
b) Authorisations and downstream users – Articles 55 to 66 of REACH	372
c) Restrictions and downstream users – Articles 67 to 73 of REACH	376
Chapter 11. CLASSIFICATION AND LABELLING INVENTORY	379
I. Definitions and Scope – Overview of Regulation 1272/2008 and its Relation to REACH	380
II. Status of the Annex VI	381
1. List of officially classified substances	381
2. Data gathering for substance classification and its consequences	382
III. Task of the Member States	383
IV. Assembling and Keeping of Information	384
V. The Annexes of CLP	385
1. Annex I	385
2. Annex II	385
3. Annex III	385
4. Annex IV	385
5. Annex V	385
6. Annex VI	385
a) Part 1	386

Table of Contents

b) Parts 2 and 3	387
7. Annex VII	388
VI. Hazard Classification and Labelling	388
1. New classification elements	389
a) Expert judgment	389
b) Weight of evidence	389
2. Substance related limits	390
3. Classification of substances	391
4. Classification of mixtures	391
VII. Instructions to Label Substances and Mixtures	394
VIII. Harmonisation of CLP Classifications in the EU	394
IX. The Classification and Labelling Inventory (C&L Inventory)	396
1. Substances to be submitted	396
2. Information to be submitted for notifications	397
3. Process of notification	398
4. Electronic file submission	399
5. Activities after filing	400
6. Content of C&L inventory	400
7. Example discussion of the C&L inventory	401
X. Difference of the EU CLP to GHS and to the Current Classification System in the EU	403
1. Acute lethal effects	403
2. Corrosive/irritating effects	404
3. Aquatic effects	404
4. Advantages/disadvantage	404
XI. Labelling	407
XII. GHS Implementation	408
 Chapter 12. EVALUATION	411
I. Introduction	412
II. Dossier Evaluation	415
1. Testing proposal	415
a) Scope and purpose	415
b) Procedure and time lines	416
c) Possible outcome	418
d) Evaluation criteria	418
2. Compliance check	420
a) Scope and purpose	420
b) Selection of dossiers	420
c) Procedure and time lines	423
d) Possible outcome	424
e) Evaluation criteria	425
3. Current experience and outlook	427
a) Current numbers	427
b) ECHA observations and recommendations	429
c) Current experience and outlook	433
III. Substance Evaluation	434
1. Scope and purpose	434
2. Selection of substances	435
3. Procedure and time lines	437
4. Possible outcomes	438
5. Current experiences and outlook	439
IV. Further Cases	439
1. Substances notified and assessed under previous legislation	439
a) Notified substances	440
b) Existing substances	441
2. Evaluation of on-site isolated intermediates	441

Table of Contents

Chapter 13. AUTHORISATIONS AND RESTRICTIONS	443
I. Authorisations	444
1. Aims of the authorisation process	444
2. General provisions – Articles 56 to 57	445
a) Authorisation requirements in relation to SVHCs	445
b) Exemptions from authorisation requirements	446
3. Procedure(s) – Articles 58 to 64	449
a) Procedure(s) for including substances in Annex XIV of REACH	449
b) Authorisation applications	453
II. Restrictions	462
1. The aim of restrictions	462
2. General provisions	463
3. The restriction process	464
a) Introducing new and amending current restrictions – Article 68	464
b) Preparation and adoption of a restriction (proposal) – Articles 69 to 73 ..	465
Chapter 14. LEGAL ACTIONS AND APPEALS	471
I. The Available Procedures and Remedies	471
1. Review procedures before ECHA	471
a) Jurisdiction	471
b) Procedure before the Board of Appeal	473
c) Admissibility	474
d) Scope of review	475
2. Actions before the European Court of Justice	476
a) Jurisdiction	476
b) Procedure	477
c) Admissibility	478
d) Scope of the judicial review	481
3. The national courts	481
II. The Existing Case Law	482
1. Decisions of the Board of Appeal	482
2. Judgments of the EU courts	486
a) Case law on the Candidate List	486
b) Case law on harmonised classification and labelling of substances	489
c) Case law on restriction of substances	492
Chapter 15. ENFORCEMENT	495
A) General observations	496
I. REACH as a Regulation	496
II. Enforcement Bodies	497
III. Comprehensive Regime	498
B) Areas of Enforcement	498
I. Registration, Pre-registration	498
II. Supply Chain	499
III. Authorization, Use, Restriction	499
IV. General	499
C) REACH Enforcement Forum	499
I. Structure and Task	499
II. Duties: Development of Enforcement Strategies	500
III. Enforcement Projects	501
IV. Information Exchange	502
D) National Enforcement Authorities	502
I. Customs Authorities	502
II. Penalties	503
III. Overview by Country	504

Table of Contents

1. Austria	504
2. Belgium	504
3. Bulgaria	505
4. Cyprus	505
5. Czech Republic	506
6. Denmark	506
7. Estonia	506
8. Finland	507
9. France	507
10. Germany	507
11. Greece	508
12. Hungary	508
13. Iceland	509
14. Ireland	509
15. Italy	509
16. Latvia	510
17. Liechtenstein	510
18. Lithuania	510
19. Luxembourg	511
20. Malta	511
21. Netherlands	512
22. Norway	512
23. Poland	512
24. Portugal	513
25. Romania	513
26. Slovakia	513
27. Slovenia	514
28. Spain	514
29. Sweden	514
30. United Kingdom	515
IV. Current State of Enforcement Activities	516
Chapter 16. A BUSINESS STRATEGY FOR ENTERPRISES – A PRACTITIONER'S VIEWPOINT –	517
A) Songwon Group Case	517
I. Introduction	517
II. A Brief Description of Songwon Group	518
III. Songwon Strategy Implementation 2006	520
IV. REACH: a Cost, a Treat and an Opportunity	521
V. Songwon and the Implementation	522
VI. Top Management Involvement	522
VII. REACH and Business Decisions	523
VIII. REACH as a Source of Customer Intimacy	523
IX. REACH (and Regulatory) as a Marketing Tool	524
X. New Business Opportunities	526
XI. Current Status and Conclusion	527
B) REACH @ Tenneco	528
I. The Beginning of the Elephant Story: Studying the Menu	528
II. Identifying Chefs, Cooks, Maître d'Hôtel and Waiters	529
III. Sizing the Elephant	530
IV. Defining the Ingredients and "Mise en Place"	531
V. Grouping Ingredients for the Same Preparation	534
VI. Assessing the Ingredients	534
VII. Re-evaluating the Menu	535
VIII. Going for an Appetizer Instead of a Main Course	535
IX. Defining the Appetizer and Talking to the Supplier(s)	536

Table of Contents

X. Wait for the Host or Start the Dinner?	537
XI. How to Organise the Restaurant Now?	538
XII. The Opinion of a Culinary Critic?	538
Index	541
